## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_\_
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

**DETAILED ACTION**

**The preliminary amendment dated 11-19-01 is acknowledged.**

**Claims included in the prosecution are 12-22.**

***Claim Rejections - 35 USC § 102***

**1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:**

**A person shall be entitled to a patent unless -**

**(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.**

**2. Claims 12-13 and 19-22 are rejected under 35 U.S.C. 102(a) as being anticipated by Mehta (5,811,119)..**

**Mehta discloses powders containing phospholipids and retinoic acid. The powder upon reconstitution forms liposomes (note the abstract and examples, example 1 in particular).**

***Claim Rejections - 35 USC § 103***

**3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:**

**(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented**

and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12-15 and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable

over either Roux (6,103,259) or Hayward (5,585,109) in combination with Mehta cited above.

Roux discloses liposomal preparations containing alpha hydroxy acids such as salicylic acid (note the abstract, col. 2, line 54 through col. 5, line 3). Roux however, does not teach the preparation of liposomes in the form of a powder.

Hayward similarly discloses liposomal compositions containing salicylic acid (note the abstract, and examples). Hayward however, does not teach the preparation of liposomes in the form of a powder.

Mehta as discussed above, teaches that the liposomes can be prepared in a powdery form and when needed an aqueous medium is added to the powders to form liposomes.

It would have been obvious to one of ordinary skill in the art to lyophilize the liposomal compositions in the form of powders and reconstitute liposomes upon addition of an aqueous medium just before use since such a method is routinely and conveniently practiced in the art as shown by Mehta.

5. Claims 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Roux (6,103,259) or Hayward (5,585,109) in combination with Mehta cited above, further in view of either Tuitou (5,716,638) or Ribier (5,614,215).

Art Unit: :1615

**What is lacking in Roux, and Hayward is the inclusion of a xanthine such as caffeine.**

**Toutou while disclosing phospholipid containing compositions for application to the skin teaches the use of a combination of caffeine and salicylate (note the abstract and Example XVII on col. 10).**

**Ribier while disclosing liposomal compositions for application to the skin teaches that a combination of a keratolytic agent such as salicylic acid along with a liporegulating agent such as caffeine could be used (note the abstract, col. 6, lines 56-60).**

**The inclusion of caffeine in the compositions containing a salicylic acid of Roux or Hayward would have been obvious to one of ordinary skill in the art since the references of Toutou, and Hayward show the routine practice in the art of using a combination of salicylate and a Xanthine such as caffeine; one of ordinary skill in the art would expect the benefits of both agents from the resulting combination.**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *G.S. Kishore* whose telephone number is (703) 308-2440.

The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.K. Page, can be reached on (703)308-2927. The fax phone number for this Group is (703)305-3592.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [thurman.page@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.
